

Manual company pairing

Paired companies can pass on trips to each other.

Would you like to request a connection with another company? Please send this request to support@rysk-it.net. When someone from RYSK-IT has paired the company to your company, you can find this in the trip.

Send trip to paired company

In the "Trips" component, click or tap on the name of the relevant trip.

Now you can select the company you want to pass the trip on to at the right hand side under the heading "Paired company":

- Click on the "Paired company" category.
- Click on the selection field under "Select paired company".
- Click on the relevant company.
- Click on the "Update paired company" button.

The selected company can now see the trip on their trip overview.
